

CedarISP

Terms of Service & End User License Agreement

TERMS OF SERVICE & EULA

EFFECTIVE DATE
May 27, 2026

Application Name	CedarISP
Owner / Developer	Jawad Deeb
Contact Email	Jawaddeeb08@gmail.com
Governing Location	Beirut, Lebanon
Document Date	May 27, 2026

1. Agreement

These Terms of Service and End User License Agreement govern the installation, access, and use of CedarISP.

CedarISP is desktop software designed for ISP business management, including subscriber management, invoices, payments, wallet balances, cash drawer records, POS operations, employees, permissions, activity logs, local backups, network mapping, prepared WhatsApp messages, and license validation.

By installing, activating, accessing, or using CedarISP, you agree to these Terms. If you do not agree, you must not install, access, activate, or use CedarISP.

2. Business Use Only

CedarISP is intended only for business and professional use by adults or authorized business representatives.

CedarISP is not intended for personal, household, consumer, or children's use.

3. License Grant

Subject to these Terms and any agreed payment terms, Jawad Deeb grants the client a limited, non-exclusive, non-transferable, revocable license to install and use CedarISP for the internal business operations of one business.

The client does not own CedarISP. The client receives only a license to use the software under these Terms.

4. One Business, Multiple PCs

The CedarISP license may be used by the same licensed business on multiple PCs, unless a separate written agreement states otherwise.

The license may not be sold, rented, transferred, shared, assigned, sublicensed, or given to another business or third party without written approval from Jawad Deeb.

The client may move CedarISP between devices for the same business, provided the license is not abused, resold, shared, or used by unauthorized parties.

5. Custom Commercial Terms

CedarISP may be sold or provided under a custom agreement with each client.

Fees, renewal periods, subscription periods, payment schedules, included support, updates, and special conditions may be agreed separately with each client.

CedarISP may be offered as a one-time license, subscription, support package, custom commercial agreement, or another arrangement agreed between the parties.

6. Refund Policy

Refunds are not automatic. Refunds may be considered case by case at the sole discretion of Jawad Deeb.

A refund may be considered if CedarISP cannot be installed or activated and Jawad Deeb is unable to resolve the issue after reasonable support attempts.

No refund is guaranteed after activation, installation, delivery, license validation, support work, customization, or use of CedarISP.

No refund will be provided if the client violates these Terms, misuses the software, attempts to bypass licensing, shares the software, uses a cracked version, refuses reasonable support steps, or changes their mind after successful activation or use.

7. License Validation

CedarISP requires online license validation on login. During validation, CedarISP may contact a private license validation system controlled by the developer.

License validation may process information such as login time, license name or client identifier, public IP address, and validation result.

If the license is invalid, expired, unpaid, suspended, revoked, blocked, abused, or cannot be validated, CedarISP may deny access.

The client agrees not to block, bypass, modify, disable, interfere with, or manipulate license validation.

8. License Suspension or Termination

Jawad Deeb may suspend, block, revoke, or terminate a license immediately and without refund if the client fails to pay agreed fees, shares the license with another business, resells or distributes CedarISP, uses a cracked or unauthorized version, attempts to bypass license validation, interferes with the license system, reverse engineers or tampers with the application, uses CedarISP illegally, abuses support or infrastructure, or violates these Terms.

9. Restrictions

The client must not copy, resell, rent, lease, sublicense, distribute, or publicly share CedarISP; upload the installer publicly without permission; share CedarISP with another business; reverse engineer, decompile, disassemble, or attempt to extract source code; modify CedarISP without permission; bypass, disable, fake, or interfere with license validation; use cracked, pirated, patched, or unauthorized versions; remove copyright, branding, ownership, or license notices; access or attempt to access private license systems, admin systems, infrastructure, or servers; use CedarISP for illegal, abusive, fraudulent, or unauthorized activity; or use CedarISP to send spam, unlawful messages, or unauthorized communications.

Violation of these restrictions may result in immediate license termination without refund.

10. Local Data Responsibility

CedarISP stores most client business data locally on the client's computer.

The client is fully responsible for protecting the local database, backing up data, restoring data, securing the computer, securing exports, securing local backups, managing employee access, preventing unauthorized use, and protecting customer and subscriber information.

Jawad Deeb is not responsible for lost, deleted, corrupted, stolen, leaked, damaged, or inaccessible local data.

11. Backups

CedarISP may create local automatic backups on startup and may keep approximately the last seven days of backups stored on the client's computer.

The client is responsible for checking that backups exist, copying backups to safe storage if needed, protecting backups, and restoring backups.

Jawad Deeb does not guarantee that backups will always be available, complete, restorable, or free from corruption.

12. Uninstalling and Remaining Data

Uninstalling CedarISP may not automatically delete the local database, backups, exports, configuration files, logs, or related files.

The client is responsible for manually locating and deleting remaining files if they want to remove all CedarISP data from the computer.

13. Employee Accounts and Permissions

The client is responsible for creating employee accounts, assigning permissions, changing passwords, disabling accounts, and monitoring employee actions.

Actions performed by employees may affect subscribers, invoices, payments, POS records, stock, drawer balances, reports, and business records.

Jawad Deeb is not responsible for employee misuse, theft, mistakes, unauthorized access, wrong entries, deleted records, or permission misconfiguration.

14. Financial Records Disclaimer

CedarISP is a business management tool. It is not legal, tax, accounting, audit, or financial advice software.

The client is responsible for verifying invoices, payments, wallet balances, cash drawer balances, POS records, refunds, currency exchange rates, reports, taxes, accounting records, and business obligations.

Jawad Deeb is not responsible for wrong invoices, wrong balances, accounting errors, tax issues, reporting errors, employee theft, cash shortages, or business losses.

15. Payment Handling

CedarISP records manual and cash payment methods entered by the client or employees.

CedarISP does not process online card payments and does not intentionally store credit card numbers or banking credentials.

The client is responsible for all payment collection, receipt handling, refunds, tax treatment, and financial reconciliation.

16. WhatsApp and Messaging

CedarISP may prepare WhatsApp messages and redirect the client to WhatsApp or a related service.

The client is fully responsible for message content, recipient consent, communication laws, WhatsApp rules, customer complaints, spam restrictions, opt-out requests, and account bans or limitations.

Jawad Deeb is not responsible for WhatsApp bans, message delivery issues, complaints, penalties, or misuse of messaging features.

17. Maps and Location Data

CedarISP may include map and location features for subscribers, stations, fiber boxes, or network planning.

The client is responsible for ensuring that all location data is accurate, lawful, and properly authorized.

Map services may depend on third-party providers. Jawad Deeb does not guarantee map accuracy, availability, completeness, or performance.

18. Support

Standard support is provided Monday to Friday, 10:00 AM to 4:00 PM Lebanon time, excluding holidays and unavailable periods.

Support may be provided by email, WhatsApp, phone, remote desktop, or other communication methods.

Sensitive or urgent support may be available outside normal working hours, but may require additional fees.

Remote support is provided only when the client voluntarily grants access. The client is responsible for supervising support access and ensuring that any shared data, screens, files, or systems may lawfully be accessed for support.

19. Updates

Updates are not guaranteed unless agreed separately.

Minor bug fixes may be provided at the discretion of Jawad Deeb.

Major upgrades, new features, custom changes, compatibility updates, support packages, or future versions may require additional payment.

Jawad Deeb may require updates for security, licensing, compatibility, or continued functionality, and may stop supporting old versions of CedarISP.

20. Third-Party Services

CedarISP may depend on or interact with third-party services, such as hosting providers, license validation infrastructure, GitHub or website downloads, map providers, WhatsApp-related services, or remote support tools.

Jawad Deeb is not responsible for third-party outages, policy changes, restrictions, downtime, pricing, data handling, errors, or service termination.

The client is responsible for complying with third-party terms when using those services.

21. No Warranty

CedarISP is provided as is and as available.

To the maximum extent allowed by law, Jawad Deeb makes no warranties that CedarISP will be error-free, uninterrupted, compatible with every computer, meet every business need, prevent data loss, prevent employee misuse, produce perfect financial records, always validate successfully, always remain available, or work with every third-party service.

The client uses CedarISP at their own risk.

22. Limitation of Liability

To the maximum extent allowed by law, Jawad Deeb will not be liable for lost profits, lost revenue, lost customers, lost data, deleted data, corrupted database files, failed backups, business interruption, device failure, malware, unauthorized access, employee misuse, employee theft, incorrect invoices, incorrect payments, incorrect cash drawer balances, incorrect POS records, tax or accounting errors, WhatsApp bans, third-party service issues, license server downtime, installation issues caused by the client's device, or indirect, incidental, special, punitive, or consequential damages.

Jawad Deeb's total liability for any claim related to CedarISP will not exceed the amount actually paid by the client for CedarISP during the last three months before the claim.

23. Indemnification

The client agrees to defend, indemnify, and hold harmless Jawad Deeb from any claims, losses, damages, penalties, costs, or expenses arising from the client's use of CedarISP, the client's business operations, data entered by the client, employee actions or misuse, violation of laws, violation of third-party rights, WhatsApp or messaging activity, financial or tax records, unauthorized sharing or modification of CedarISP, attempts to bypass license validation, or use of cracked or unauthorized versions.

24. Privacy

Use of CedarISP is also governed by the CedarISP Privacy Policy.

By using CedarISP, the client agrees to the collection and processing of license validation data, including public IP address, as described in the Privacy Policy.

25. Termination

Jawad Deeb may terminate or suspend the client's license if the client violates these Terms.

After termination, the client must stop using CedarISP.

Termination does not remove the client's responsibility for unpaid fees, misuse, damages, confidentiality, restrictions, or any obligations that should reasonably continue after termination.

26. Data After Termination

Because CedarISP stores most data locally, the client may still have local files, exports, backups, or database copies after license termination.

However, the client's right to use CedarISP ends when the license is terminated.

The client is responsible for preserving any business records required by law before uninstalling, deleting, or losing access to CedarISP.

27. Confidentiality

The client must keep license keys, activation details, private support information, technical details, and any confidential information secure.

The client must not share private license information, internal tools, private URLs, or confidential technical details with unauthorized persons.

Jawad Deeb is not required to disclose private admin panel details, infrastructure details, server URLs, security systems, or internal license management tools.

28. Governing Law and Jurisdiction

These Terms are governed by the laws of Lebanon.

Any dispute related to CedarISP will be handled by the competent courts of Beirut, Lebanon, unless mandatory law requires otherwise.

29. Changes to These Terms

Jawad Deeb may update these Terms from time to time. The updated version will apply from the effective date shown above or from the date it is made available.

Continued use of CedarISP after changes means the client accepts the updated Terms.

30. Contact

For questions about these Terms, contact Jawad Deeb at Jawaddeeb08@gmail.com.

Acknowledgment

By installing, activating, accessing, or using CedarISP, the client confirms that they have read, understood, and agreed to this document.
